Ostomy patient

„**stoma**“ – in greek „mouth“ (figuratively opening)

Ostomy patient disable person who has stoma opening, usually colon, ileus or ureter.

*Change of basic physiological functions,
uncontrollable emptying in unnatural way with
basic need to have ostomy appliances.*

MUDr.Lúčan SLOVILCO

Stoma is always a serious problem

clubs, ILCO volunteers

Ostomy products

Ostomy care

ET nurse – mental support, product recommendation + how to use it, support courage, other info

Et nurse needs sufficient time and individual attitude

She is **GUARDIAN ANGEL** for an ostomate

Based on ILCO - ET nurses don't have enough time to educate ostomates.

Only 25% of ostomates have a chance to visit ET consultancy rooms (????)

ET consultancy rooms

YES

Patient - info before/after surgery
