

PRESS RELEASE

The European Parliament welcomes the presentation of the IV Sine Dolore World Park 2018

Menorca, April 17, 2018

The fourth edition of Sine Dolore World Park 2018 will be presented on April 26th by holding an international event in the European Parliament. The Sine Dolore Foundation and the MEP Rosa Estaràs Ferragut, of the Group of the European People's Party, organize this event, in partnership with the Active Citizenship Network, a flexible network of European civic organizations that participate as partners in their different projects, aimed at fostering the active participation of citizens in the development of European policies.

The initiative arose during an informal meeting held at the beginning of the year between Rosa Estaràs MEP and the president of the Foundation, Dr. Jordi Moya, with the aim of promoting the international projection of the Sine Dolore World Park, the only park Thematic of the world against pain and for the quality of life that is celebrated every year in Menorca (Balearic Islands).

From local to global: promoting societal impact of pain

The act will be carried out in order to promote the social impact of pain from different perspectives, through the interventions of representatives of various associations and entities directly linked to the fight against pain such as Pain Alliance Europe, Societal Impact of Pain (the multi-stakeholder platform in Europe dealing with chronic pain) and Efhre International University, among others.

Sine Dolore World Park

The IV Sine Dolore World Park 2018 will be held from May 1 to 6 in Menorca. The official presentation of the Park in Brussels will also serve to inform about the different activities that will be carried out during these dates in all the municipalities of the island.
