

European Huntington Association

Heritable neurodegenerative disease

50% chance

Starts normally at the age of 30-50

In Europe 50.000 patients

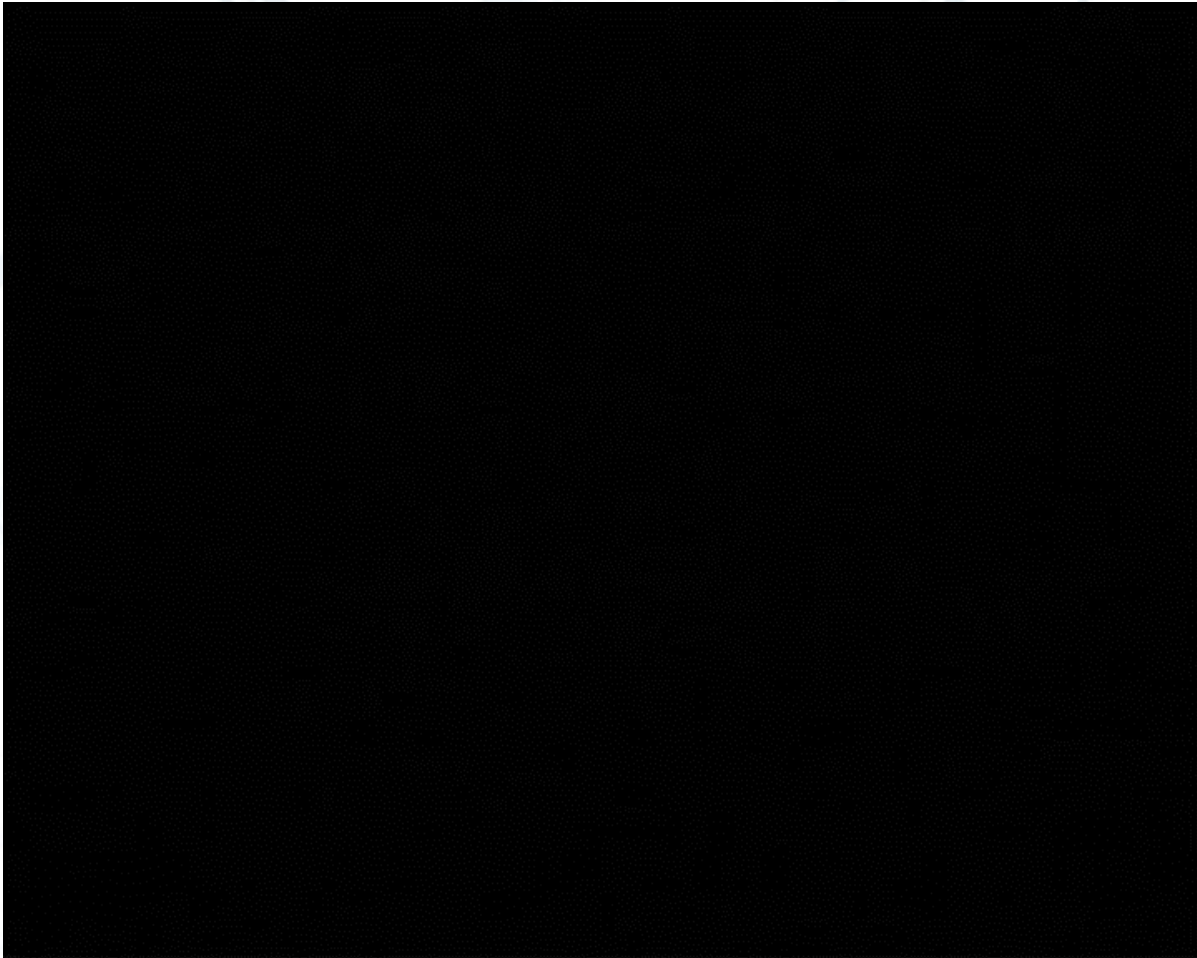

EHA is an umbrella organisation

Represented in 28 countries

30.000 members

European Huntington Association

VIDEO

Cost per patient

Cost per patient (UK)

£ 28.000 per year per patient

= £ 1.400.000.000

= Euro 1.800.000.000

Reducing costs

Proper health service = reducing the cost per patient

New technology = Artificial Intelligence

Dir. Martin Seychell: «Only a fragment of all the health data collected is used. The data should be standardized and accessible. Data is the resource in research.»

“The Commission see research to be the main strategy to solve our future challenges. That is why we have 100 billion Euro in the next 5 year budget set aside for research. Digital solutions and infrastructure has a budget for 20 billion euro. “

Individual level

Change from the expert role to a collaborative teamwork

Involve the patient and their partner/relative in the decision making will make him/her more responsible and proactive in checking out if this works for me

Reducing “tons” of medicine being prescribed without any beneficial effect for the patient!

Thank you!
