## Qualitätssicherung: Prozessqualität durch Patientendokumentation

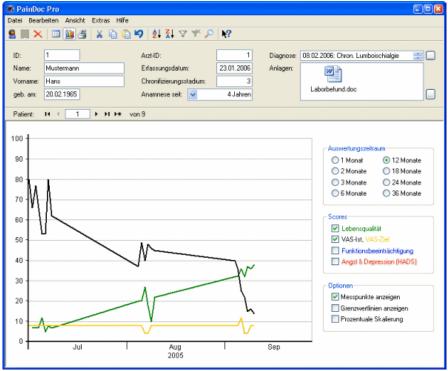

## IVR- an Integrated Health Care Concept for (Low) Back Pain Patients

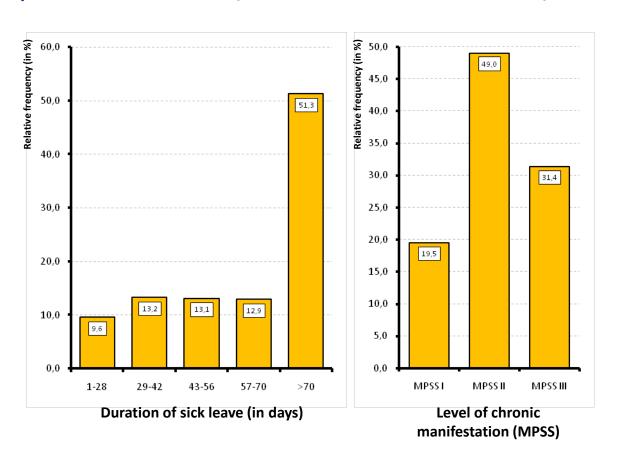

#### electronic evaluation and presentation

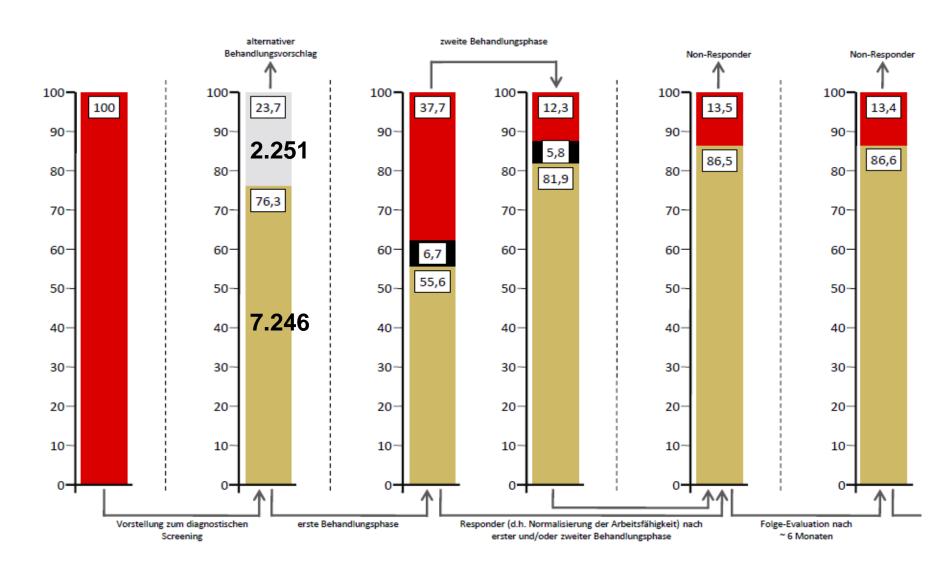

## **Quality control**

Demographical data (duration of sick leave, level of chronic manifestation, allocated patients)

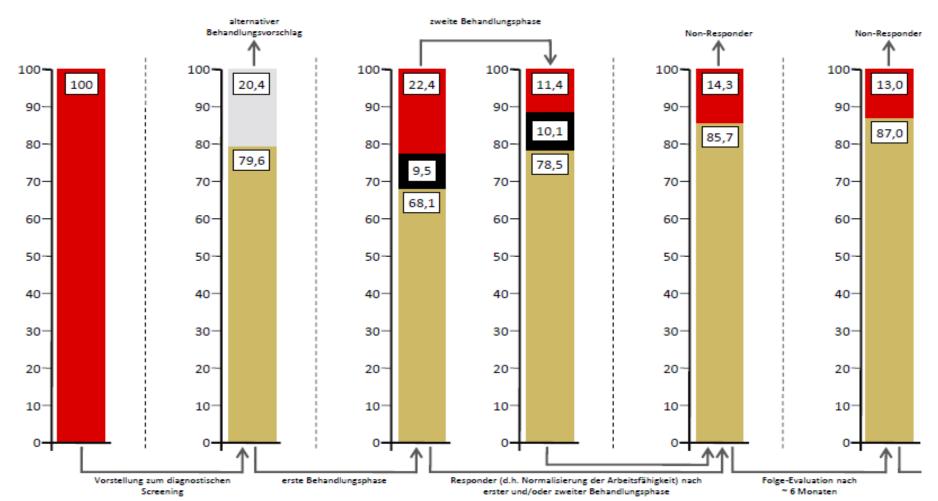

## Overall results n= 9497 Patients / 36 Centers

## **IVR-Results (last 12 months)**

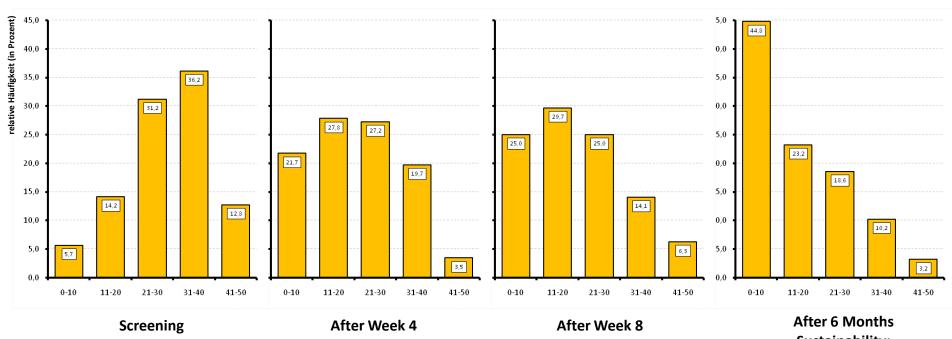

n= 1709 Patients

## **Quality control**

## Pain related disturbance of participation in every-day life (mPDI)

( 0-10 No; no disturbance 41-50 strongest disturbances)

After 6 Months
Sustainability:
(Patient continues
to work on
himself!)

## **Quality control of involved centers**

(multimodal/integrative Care subacute/ chronical back pain patients)

Weekly benchmarking in regard to successes of therapy
Each row shows the successes of each individual center after 4 Weeks, 8
Weeks and 6 Months

## Recent improvements

- Risk-Management-Procedure based on usage timeframes
- Involvement of the insurance companies as designated allocators
- Global budget
- Governance through individual self-disclosure of the patient
- Intensity of treatment depends on individual needs of the patient
- Weekly benchmarking of all medical professionals
- Bonus-/Malus System according to success of treatment
