

National Patients' Organisation – Malta
On the occasion of the Patients' Rights Day
Celebrated on the 18th April

On the occasion of the 14th celebration of the Patient's Rights Day, the National Patients' Organisation - Malta would like to express its appreciation and recognize the professional work that is being made by European Health Authorities and all stakeholders involved in their tremendous efforts to contain as much as possible this pandemic.

Covid-19 made us all aware, that there is nothing more precious than health. We all realized the responsibilities that each and every one of us has, to take the best care of our health and that of others. We are sure that after covid-19 many of us will take the appropriate steps towards improving our health by making the real life changes from reducing stress to making the necessary nutritional changes that will bring about significant difference. Through the implementation measures taken we became more aware of the importance of hygiene for the prevention of disease.

NPO- Malta wants to ensure patients that this organisation will endeavor with its campaign in raising awareness on Patients Rights by continuing to work with and support patients to voice their concerns as it has been doing through the last three years!

Irene Schembri

President
